**Re: Request for Information Pursuant to the Freedom of Information Act**

Dear Mr. Engels:

This request follows up on our prior communications. Please accept this request, pursuant to the Freedom of Information Act, 5 U.S.C. § 552, for the following information and data concerning the Smurfit-Stone/Frenchtown Mill site in or near Missoula, Montana (the "Site"):

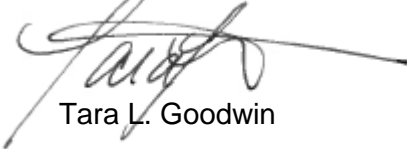

- Please export the data relating to the Site contained in any Scribes database (or similar database) into Excel and produce the native Excel files. It would be very helpful if these Excel files would be in a "vertical" format (one analytical result per row) that would make it easy to be brought into an Access database. In addition to the actual analytical results, we would like the x,y-coordinates for the sample locations and the associated coordinate system, the depths samples were collected, well construction information and any other relevant information about the samples and their locations; and
- Please provide any other sampling data concerning the Site that is not contained in a Scribes (or similar) database, to the extent such data is not encompassed by my corresponding request (of the same date submitted under separate cover) for certain Site file records. If the data is maintained in Excel or other native format, please provide the data in its native format.

---

To the extent that this request encompasses exempted material, please contact me prior to processing my request. Please supply this information if fees do not exceed \$450, which we agree to pay. Please notify us if fees exceed \$450, or if you deny any part of our request. If you do deny any part of our request, please specifically cite which exemption you rely on, and notify us of the appropriate appeals process.

If access to the records I am requesting will take longer than a reasonable amount of time, please contact me with information about when I might expect copies or the ability to inspect the requested records.

Sincerely,

A handwritten signature in black ink, appearing to read "Tara L. Goodwin", with a long horizontal flourish extending to the right.

Tara L. Goodwin
